

WHO WE ARE

imID delivers secure, reliable, and compliant electronic identity solutions for individuals, businesses, and government entities. We strive to meet the highest EU standards for security, integrity, and confidentiality in electronic transactions, ensuring that every digital interaction—whether for signing documents or verifying identities—is protected with robust cryptographic and operational safeguards.

imID was founded by 10 banks and 3 telecom operators in Armenia.

IDENTIFICATION AS A SERVICE (IDaaS)

imID offers **Identification as a Service** to facilitate seamless identification for RA citizens using SIM and eSIM Mobile IDs (imID). Users can easily be identified through their imID by simply using their PIN.

USE CASES

Customer Onboarding

Simplify and accelerate the onboarding process for new users seamlessly across platforms.

Identity Verification

Instantly and securely identify citizens to prevent fraudulent activities in real time.

Transaction Confirmation

Ensure that only verified users can securely confirm and authorize transactions.

Data Access for Businesses

After successful onboarding, businesses will receive essential user data, including First Name, Last Name, SSN, and Phone Number.

BENEFITS

Effortless Customer Identification

Streamlined user experience for quick and easy identification through imID.

Higher Conversion Rates

Improve customer acquisition and retention while reducing cyber friction.

Enhanced Fraud Prevention

Advanced, encrypted identification methods to safeguard against fraudulent activities.

Future proofing

Ensures compliance with future laws that are already in the works.

SEAMLESS API INTEGRATION

Easily integrate imID into your system with comprehensive API documentation and support.
